CASE STUDY 09 / RETAIL & E-COMMERCE

Replenishment alerts before stock-out, not after

Power Apps • Power Automate • Power BI

A 22-store retailer was replenishing based on gut feel. A barcode scanning app on warehouse devices, a low-stock alert flow and a manager replenishment view put the right stock back on shelves.

62%	Fewer stock-outs on top SKUs
1 day	Replenishment cycle (was 3 days)
22 stores	One replenishment view

“We stopped guessing. The system tells us when to reorder.”

Head of Operations, retail client | Stack: Barcode scan, low-stock alerts, replenishment view
